

Making sense of soil tests workshops

Presenter: David Hardwick from Soil Land Food.

Soil tests help you better understand your soil chemistry and guide soil health and nutrient management on your farm but interpreting the results can be tricky.

Join us for a one day workshop, with soils expert David Hardwick from Soil Land Food to gain an introduction to understanding soil tests. You will learn how to make sense of your soil test results and how to identify soil constraints and key nutrient issues. This workshop will help you be more informed about your soil test when getting agronomic advice.

The workshop will explore:

- Organic Matter/Carbon
- Soil pH
- Key nutrients such as Cation Exchange Capacity and cation balances, phosphorus and sulphur
- Soil constraints such as salinity, acidity etc.
- Options to improve soil fertility

We ask that you bring soil test results taken from your property to the workshop.

You may already recent soil tests OR you may choose to test your soil. If you do, make sure you give yourself enough time before the date of the workshop

When: Tuesday 7 June - Central Coast

Register Here: <https://bit.ly/3xwzp2U>

Wednesday 8 June - Richmond

Register Here: <https://bit.ly/3o1cUQL>

Thursday 9 June Camden

Register Here: <https://bit.ly/3cX2KKn>

Time: 9am - 3pm

This workshop will be conducted in compliance with COVID19 safety guidelines.

This project is supported by Greater Sydney Local Land Services through funding from the Australian Government's National Landcare Program.

Lunch will be provided on the day. For catering purposes, please register each person separately.

Registration is essential.
